Cedarbrook Sauna + Steam – Family owned and operated since 1971

We build cedar saunas, kits, sauna doors, accessories for commercial saunas & residential sauna rooms — AND we have the expertise to fit you with the right sauna heaters, steam room doors and steam room equipment.

If you are ever in the Seattle area, we have a showroom just northeast of the city where you'll find sauna and steam rooms plus accessories on display.

Our friendly staff is ready to answer your questions on what we do best: building and designing sauna rooms and doors, selecting the sauna heater that best fits your needs and answering any other questions regarding sauna and steam rooms.

If you have any questions regarding saunas and steam rooms, we're your resource!

Sweating the details since 1971

Maintenance for Sauna:

We recommend one of our water based sauna wood sealer products be applied once a year for the first 4-6 years. See the wood treatment section in the accessories category on our website. The products are Miracle Cover Marine and Seal Once. After that we recommend our Oil based sauna wood oil be applied once a year or as needed. This product revitalized the dry baked sauna wood. These products will double the longevity of a commercial sauna room and keep it in a hygienic state.

Also it is important that your custodial service does not hose the sauna rooms out but wipe the benches and wet mop the floors weekly. We recommend using the sauna wood Kleena, also shown in the wood treatment section in the accessories category on our website.

- <http://www.cedarbrooks sauna.com/sauna-kleena-cleaner.html>

Sauna heaters require almost no maintenance. If they're any smells of burning plastic turn the sauna off and have an electrician inspect the unit for any signs of burnt wires or malfunctioning components. The rocks do need to be replaced every 3-4 years in a commercial setting. Any replacements parts can be ordered through Cedarbrook.
